Comfort and breathability CYCLING APPAREL

Gitane's range of cycling apparel features the latest in comfort and breathability standards. The range of cycling apparel includes standard knicks, bib and brace knicks, short sleeve jerseys and windproof vests. The Gitane cycling tops are designed to combine great appearance with extreme comfort and excellent visibility.

The Gitane Cycling Jersey is made from ICE (Inner Cooling Efficiency) 3D FABRIC which wicks body moisture in 3 dimensions away from the skin. Multi-filament yarn next to the skin achieves comfort and optimum moisture wicking whilst air flow (breathability) is promoted through the textured surface allowing for more rapid evaporation.

The Gitane Cycling Wind Vest is made from M.W.P. (Micro Weather Protection) fabric which is the ultimate fabric in finding the correct balance between breathability and water resistance. The microfibre construction repels the weather elements whilst allowing water vapor from your body to escape.

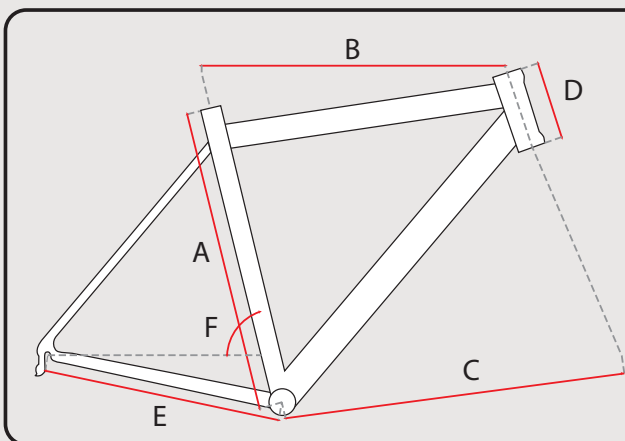

The Gitane Cycling Knicks and Bib/Brace Knicks use the finest quality 200GSM breathable lycra and have the ultimate 4 Way Pad insert in them allowing for rapid evaporation and breathability.

The 4 Way Pad delivers one of the world's most advanced anti-friction design with layers of advanced material working with one another helping to deliver the ultimate riding experience.
